“YAS QUEEN” CROWNS

If you want to try a piece on black Aida, this would be the one to start with. “Yas” and “yas queen” are encouraging exclamations that originated in the queer community and can be traced to the 1980s drag ball scene in New York. Like many phrases from that community, “yas queen” has now entered the mainstream. In addition to shouting the phrase as a show of support, you can now stitch and display it always. The crowns in this design are here to honor all feminist queens.
