

# guided starburst mirror project

## instructions

2. Cut the dowels (or bring them to a hardware store to be cut) to the lengths shown below.

You'll need 64 dowels total (16 of each length) to fit this mirror.

3. Hot-glue the dowels to the front of the poster board circle about 1 inch in from the edge. Start with the longest ones, spacing them evenly apart, and continue with the rest as shown below. Let dry.
